

Village of Cambridge

Main Street Improvement Project

Summary of Construction Activities – May 2012

The Village of Cambridge, with grant funding by the NYSDOT and the Federal Highway Administration will be making improvements to Main Street over the course of approximately four weeks, beginning on or about Wednesday, May 9, 2012.

Construction will begin at the west end of the project area (South/North Union Street), and proceed east, with each intersection anticipated to take approximately a week to complete.

During construction traffic flow will be maintained, usually two-lane flow, but occasionally with flagger controlled single-lane flow.

Pedestrian access will be maintained throughout construction, as will access to businesses and driveways.

Construction activities will be taking place Monday through Friday between 7 AM and 3 PM.

An engineer, Phil Trifaro, will be on-site throughout the project and is available for questions or concerns, or you can contact the Village offices, 677-2622, for more information.

The intersections that are subject to the construction effort are shown below.
